

# Modernization Kit ASSA ABLOY M Track protection plates for industrial doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in  
door opening solutions

## Key Benefit

Cost-saving

Safety

## Prevent damage to overhead sectional door tracks

The owner of the loading does not want to worry about his personnel accidentally damaging material. And personnel driving vehicles through the door opening does not want to worry about causing damage.

Track protection plates can be installed on the corner of the daylight opening on the floor to protect the tracks against collisions. This saves costs on repairs, but also attributes to safety. A door with damaged tracks can derail its rollers from the track and the door may fall down.

The track protection plates are 60 cm high, so big enough to protect against forklift trucks, pallet trucks and rollcages.

The 6 mm thick track protection plates are installed with bolts into the concrete. Additional brackets are bolted onto the tracks to make a rigid construction.

The plates are painted yellow to make them clearly visible.

## Overview

Available kits for  
ASSA ABLOY M  
Track protection  
plates

Name	Type	Remarks
Track protection kit	For all track types	Set of 2

## Benefits

**Key benefits are:**

- Prevents damage to tracks
