

# Modernization Kit ASSA ABLOY M Ventilator for industrial doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in  
door opening solutions

## Key Benefit

Sustainability

Convenience

## A breath of fresh air

### Applications

There are premises where the door needs maximum insulation, especially cold storage warehouses or a work environments in a nordic country. There can also be premises where a bit of fresh air is welcome, especially when there is no expensive air conditioning.

Ventilation is important to create a healthy work environment. Refreshment of air, where carbon monoxide is refreshed by oxigen keeps personnel healthy and more productive.

### Easy to install and use

A ventilator is installed in the bottom section of the door. It has a black grill on both the inside and the outside. The closable type has a turning wheel on the inside to open and close the air inlets. It also has an insect screen to keep insects outside.

The installation process is quick, as it can be done directly on the door. It will not disturb your daily business.

## Overview

The non-closable "P" ventilator

The closable ventilator

## Available kits for ASSA ABLOY M Ventilator
