## ASSA ABLOY M SL-Vitalization

ASSA ABLOY

ASSA ABLOY Entrance Systems

The global leader in  
door opening solutions

### Bringing new life to existing automated sliding door systems

#### Key Benefits

Convenience

Sustainability

Safety

Cost-efficiency

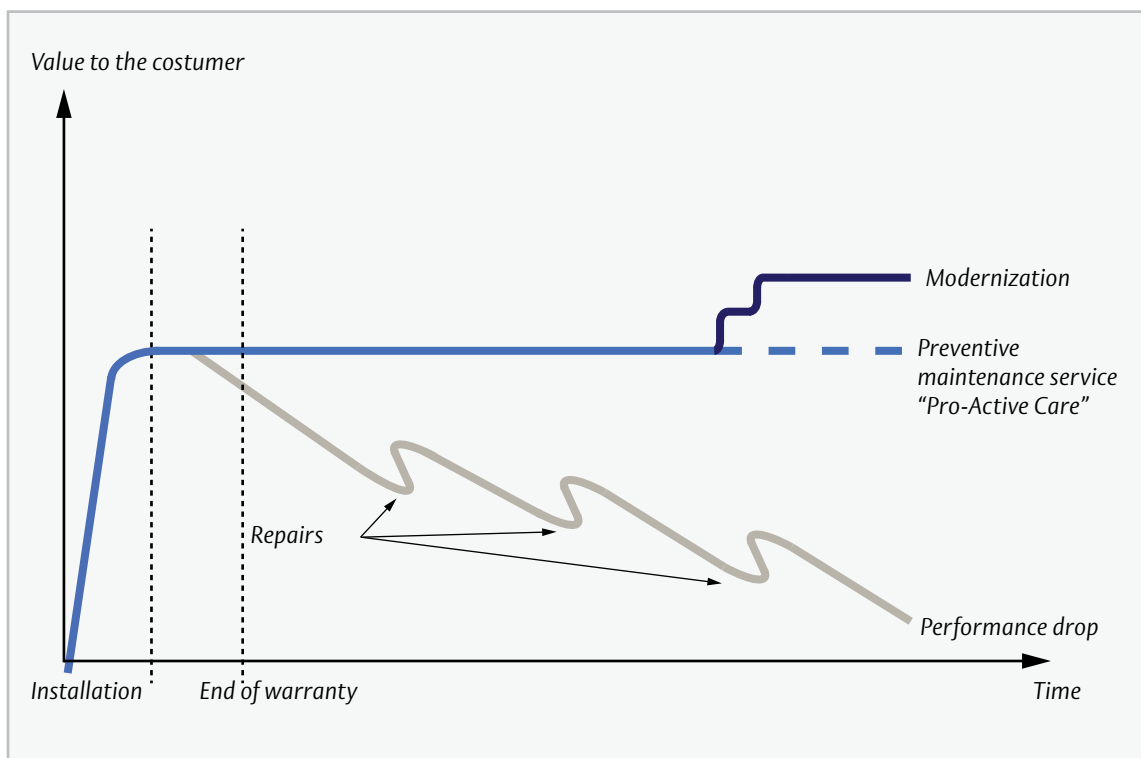

New entrance systems aren't the only way to achieve modern entrances. ASSA ABLOY Entrance Systems offers many ways to modernize your doors and equipment. With big steps or small, we can keep your entrances in tune with changing times. Modernization is a solution for customers who have an existing equipment.

Why pay for new when you can exchange? If properly maintained, a sliding door system can last many years. Instead of a costly replacement of your complete door system or accepting a decrease in performance, convenience and safety, you can modernize the operator while keeping your frame and glass.

By modernizing your sliding door system with the ASSA ABLOY M SL-Vitalization kit, you will:

- Get a state-of-the-art automated entrance with a fraction of the cost for a new door system
- Increased convenience
- Improved maintenance and spare parts possibilities
- A selection of available and compatible add-on features
- Increased performance and safety to the latest standards and norms

## Maintenance and Modernization graph

## Cost-effective upgrade for existing sliding door operators

The Vitalization Kit is designed with universal fittings so it can easily be adapted for use with most major brands of operators. It's a very cost-effective choice when an existing installation is in good shape, but the operator requires an expensive repair. It will also ensure that your automatic sliding door entrances are

operating optimally in terms of safety, performance and energy efficiency. The kit includes the drive unit, control unit and transmission, all with state-of-the-art electromechanical components.
